

Virtual CD v9

Trouble-free management of CDs / DVDs in lessons

Easy use of CDs and DVDs in lessons using Virtual CD and the Virtual CD Network Management Server

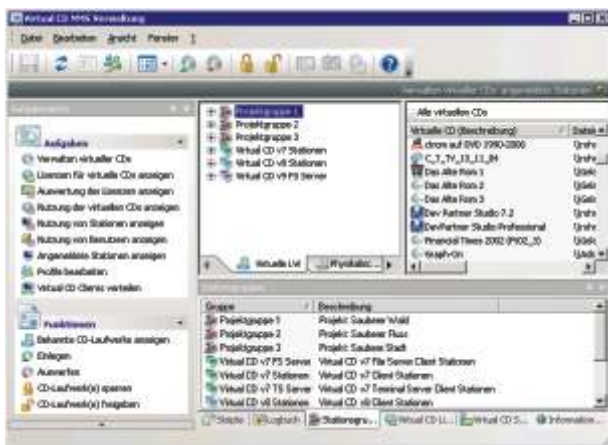

Virtual CD® copies your CDs and DVDs to the hard disk of the student's workstations or on a central file server. Each workstation can work with up to 23 different virtual CDs at the same time and the original physical CDs do not even need to be at hand.

Virtual CDs behave just like the original but are loaded and run immensely faster (comparable to a 200x CD physical drive!). Thus Virtual CD is suited for all kinds of educational CDs, encyclopedia, multimedia CDs, project CDs, etc.

With Virtual CD's virtual burner, you can use any CD-recording software to make a new virtual CD for example, to save and distribute project results.

No more original-CDs will get lost or damaged and also the cumbersome distribution of the originals at the beginning of the lesson and collection of them at the end of the lesson are a thing of the past. Thus you have more time for teaching itself.

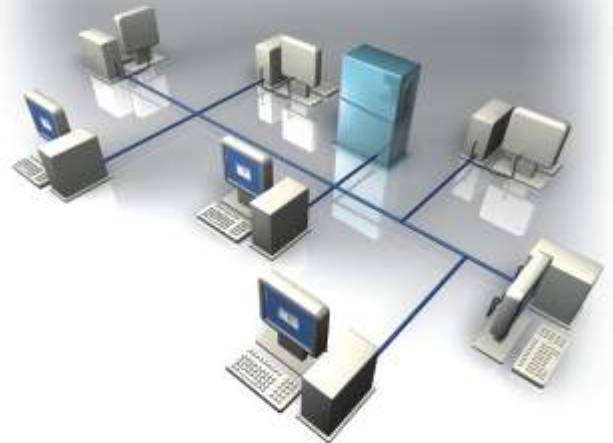

All CDs for the lessons are immediately available exactly when you need them.

With the Virtual CD Network Management Server you have control when needed:

- Insert any virtual CD centrally for your students exactly when you want them to have it.
- Take the virtual CDs away from the students, if necessary.
- If necessary, block the access to physical or emulated CD drives from any student workstation(s).
- Unlock the emulated CD drives centrally if required.
- You receive extensive license control and monitoring for your CDs.
- You have a detailed usage statistic at your disposal.

The utilization of educational CDs for your lessons becomes considerably more effective and trouble-free, if you use Virtual CD and the Virtual CD Network Management Server!

Your advantages with Virtual CD:

- Access to CDs/DVDs without a CD drive
- Use any program to create virtual CDs
- Automatic copy mode
- Work with up to 23 virtual CDs at the same time
- Password protection for virtual CDs
- CD organization according to e.g. Subject / year / category
- Automatic creation of desktop icons
- Integration in Microsoft® Explorer and Windows® Desktop
- Burning your own CDs/DVDs (e.g. class projects) in ISO-Format
- Creation of virtual CDs directly from the Microsoft Explorer (Any contents)
- Tying in self-made CDs (ISO-Format) as virtual CDs

Trouble-free management of CDs/DVDs in your lessons with Virtual CD and the Virtual CD Network Management Server!
